

MEDTEK

GLOBALMED

Our Partners

PHC Europe

A Member of PHC Group.

Company Profile

About Us

MEDTEK Company is Founded on 2021,& **Global Med** Company is Founded on 2024 by a Professional Team for IVD Technology, Who Has about 12 years' Experience in The Laboratory Equipment and Diagnostic Products in the HealthCare Services.

Main Activity

- Supply And Sale Of Laboratory Equipment, Diagnostic Test Systems, Laboratory Consumables, Laboratory Information Systems (LIS) .
- Development Of Projects According To The Customer's Requirements.
- Complete Supply According To International Standards
- Installation, Warranty And Aftersales Service
- Organization Of Laboratory Personnel Training
- Full Lab Automation System
- Specialized Team For Flow Cytometer Service And Application.

Our Partners

The companies are the **Distributor** for:

- **SNIBE** for **Chemistry & HORMONE** .
- **MONLAB** FOR **CHEMISTRY REAGENT**
- **ZYBIO** for **Hematology Urine & Coagulation** Analysers .
- **PHC EUROPE PATHFAST** FOR **SEPSIS**
- **INFOMED** for **Home Dialysis & ICU**

Our Vision

Our Vision Is To Be Established As The Best Laboratory Company In Lebanon, In Terms Of Expertise, Innovation, While Returning Value To Our Customers To Be Within The Following Values.

- **High Quality**
- **Good Deal**
- **Professional Service**

Our Service

The Company Provides Highly Qualified Service Support For Our Customers 24H/7 By A Professional Team From Seven Engineers

Our Products

Total Laboratory Automation Solutions

SATLARSTM T8

2025

Integrated Systems

Biolumi® CX8

Maximize Your Lab's Potential with Just 3.8 m²

Biochemistry
module

BIO: **1600** tests/h
ISE: **300** tests/h

Immunoassay
module

Up to **600** tests/h

Decapper
module

Up to **400** tubes/h

Immunoassay Analyzer - X Series

*Available at the end of 2025

Biossays® Test Menu

Hematology

Hematology analyzers, also known as blood cell analyzers or blood cell counters, are among the most widely used instruments for clinical testing in hospitals.

These automated instruments are designed to rapidly analyze whole blood specimens for the complete blood count (CBC). Results typically include red blood cell (RBC) count, white blood cell (WBC) count, platelet count, hemoglobin concentration, and related calculated parameters.

Using hematology analyzers not only improves the accuracy of experimental results, but also provides multiple experimental indicators, which play a crucial role in auxiliary diagnosis and differential diagnosis of diseases. As such, these instruments have become indispensable tools in modern healthcare.

U 3601 Urinalysis Hybrid System

The U 3601 is a cutting-edge machine that seamlessly combines urine physical analysis, chemistry analysis, and sediment analysis. It is designed to elevate your urine testing processes, offering 16 chemistry analysis parameters, 32 sediment analysis parameters, and 5 physical analysis parameters. Utilizing laminar flow imaging, high-speed photography, and medical image recognition technology, the U 3601 provides high-resolution images and accurate classification of urine particles.

MALDI-TOF Mass spectrometry system EXS 2600

(A Convenient and Efficient Tool for Microbial Application)

Based on matrix-assisted laser desorption/ionization time-of-flight mass spectrometry technology, EXS 2600 is used in diagnostic identification for microbes, include several kinds of bacteria, fungi, molds and etc. Compared with traditional microbe diagnosis method, EXS 2600 mass spectrometry system could offer our end-user high-throughput screening, convenient operation and more sensitive and accurate identification results via advanced sample pretreatment kit technology, user-friendly software and comprehensive strains database.
